DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 4, 5, 8-11, 13, 14, 16, 17 are rejected under 35 U.S.C. 102(b) as being anticipated by LEIFER 6,459,171.

Regarding claims 1, 8, 9, 10, 13, 16.

LEIFER discloses a plurality of loads (209, 211, 213); a plurality of power supplies (203, 205, 207) coupled to a common power distribution system (215), the plurality of power supplies are adapted to provide power to said loads; and control logic coupled to said power supplies, said control logic determines whether output current from a power supply to a load is below a first threshold and if so, causes one or more power supplies to be disabled (col. 6, lines 59-67).

Regarding claims 2, 11, 14.

LEIFER discloses the system of claim 1 wherein said control logic also determines whether output current from at least one of said power supplies exceeds a second threshold and, if so, causes a presently disabled power supply to be enabled (col. 7, lines 1-13).

Regarding claims 4, 5.

LEIFER teaches supplying power to an application with a shared power source.
Computers or servers are inherent loads for an application.

Allowable Subject Matter

Claims 3, 6, 7, 12, 15, 18, 19, 20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
